EDUCATION

Vellore Institute of Technology

Bachelor of Technology in Computer Science and Engineering

Vellore, TN, India

Sep. 2022 – July 2026

EXPERIENCE

AI Engineer - Intern

Kazunov 1AI

April 2026 – Present

Bengaluru, Karnataka, India

- Built AI-powered data extraction pipelines using Python and LangChain to parse employee insurance data from PDFs, Excel sheets, and multi-format documents.
- Leveraged LLMs to automate interpretation of unstructured insurance documents, reducing manual data entry and improving accuracy.
- Contributed to developing an enterprise medical insurance dashboard centralizing employee and dependent coverage data for organizations.
- Designed multi-format document ingestion workflows ensuring clean, structured data flow into the dashboard backend.

Python Programming Intern

Main Crafts Technology

Sep 2025 – Oct 2025

India

- Developed Python scripts to automate repetitive tasks and streamline workflows.
- Implemented data analysis and visualization using libraries like Pandas.
- Created simple command-line tools and mini-projects for real-world problem-solving.
- Debugged and optimized existing code to improve efficiency and maintainability.
- Collaborated with team members to test, review, and deploy Python-based applications.

PROJECTS

House Price Prediction Model | Python, Docker, scikit-learn, Streamlit, XGBoost

July 2025 – Dec 2025

- Built an end-to-end house price prediction system using XGBoost to estimate property prices based on location, size, amenities, and accessibility factors.
- Performed data preprocessing, feature engineering, and exploratory analysis on a 12K+ records dataset to improve model accuracy.
- Deployed an interactive Streamlit web application with real-time predictions, ensuring scalability using Docker for consistent deployment.

NeuroAid | Python, Gemini API, Flask, Pandas, NumPy, NLP

July 2025 – Dec 2025

- Created an AI-centered healthcare platform incorporating symptom-to-disease prediction model, conversational chatbot, and doctor-patient administration system for enabling early disease detection and decision-making.
- Used NLP and knowledge-imbued neural models for precise, contextual diagnosis based on natural language symptom input.
- Created an interactive chatbot for real-time clinical consults and a sign-up gateway connecting patients with qualified practitioners.

FeTA | Python, OpenCV, TensorFlow, Streamlit, Scikit-learn

July 2025 – Dec 2025

- Developed an advanced face analytics program using OpenCV and InsightFace for real-time face recognition, emotion detection, and age/gender estimation.
- Published plugin to websites gaining 2K+ downloads and an average 4.5/5-star review
- Integrated Streamlit/Flask for live video input, real-time processing, and results storage for later study.
- Tailored for psychological and social research use-cases.

TECHNICAL SKILLS

Languages: Java, Python, SQL, HTML/CSS

Frameworks: Flask, WordPress

Developer Tools: Git, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse, Jupyter Notebook

Libraries: pandas, NumPy, Matplotlib
